Simple, hard, fast, fun. This game is absolutely brilliant and is the best "pure challenge" game I've ever played. Randomized pattern distribution keeps things fresh and exciting, and encourages creative ways to navigate through levels, even if you've already cleared them hundreds of times. The controls are rock solid. The sense of satisfaction you get with every incremental improvement is just the best.

Buy this game. It is absolutely worth the 5 dollars.. After about an hour there is really nothing else to do. You go tough guards so fast that even your population reaches a stand still. Not worth the price needs more content.. This game is AMAZING so far keep it up developers cause this game is FANTASTIC. PERFECT! PRIDE OF CHINESE GAMES.. i love this game so much the creator worked three years on this and i actually got to meet him at a comicon he is really cool and i would like to give him as much support as i can and if you see this thanks for making it and i actually record this on my youtube channel and plan to get more videos out soon good luck on the game and please play it. This game gave me so many hours of fun, the level design was amazing, the way everything worked was great, and I loved how sometimes I'd be so close to the next flag and I'd be shaking in terror as I wondering if I was going to be able to throw myself correctly to grab onto the next rock or stick my climbing axe into the next rock. Can't believe this game hasn't blown up, it's absolutely so much fun. I'd get sweaty, my lenses would get foggy but I just kept going! All I'd think about would be sticking my axe into some ice, or having fun throwing myself into the void! 10/10 one of my favorite VR games, if not, one of my favorite games ever.

I keep getting these games in bundles and they seem like flak just to show there are more games in them. This is a pretty bad game. First time through and a B-... its just a lot of the same. Same enemy, same background which is a black background, same effects and lame music. Even if this was given to me for free id give it a No. Its cheap and boring.. If you are given the choice of playing this game or being hit repeatedly in the head with a frying pan, request specificions of the frying pan and its wielder before committing yourself to a decision. Fun time killing game.. I have waited so long for these skins (Slovakia) and finally they are here. Sure the price may seem steep for only four skins, however if you are a true Slav now you can represent. Thank you so much SCS.. Karrigan's chair is amazing.

10/10 ValveGN. Great time wasting game. Can't wait for full release.. always like kittens on the internet. can do nothing about it
